Retractable vehicle seat, with mobile back

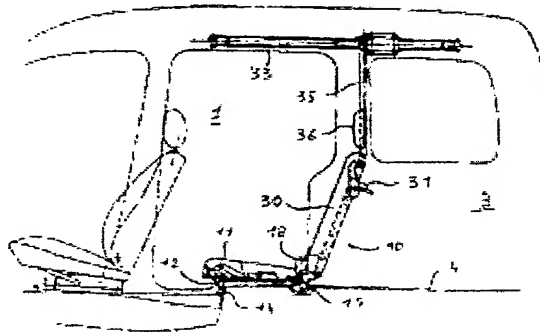

(FR2725669)

SIEGE ESCAMOTABLE A DOSSIER MOBILE**Index Terms:**

RETRACTABLE
SEAT; VEHICLE;
SLIDING BACKREST;
FOLDING SEAT;
SIDE RAIL; ROLLER

(FR2725669)

The retractable seat has a mobile back (30), and is provided with a seat (11), which is supported by connecting rods (12, 27), which are linked at their extremities so as to pivot around transverse axes (14, 28), carried respectively by the seat and by a primary element (4) of the vehicle structure. In addition, the seat back is also linked at its extremity to a second element (34) of the vehicle structure. The extremity of the seat back is fitted with a system of slideways (40), which are supported by the side rails (33), which form a rigid guide structure and are connected to the structure of the vehicle. Each guide rail is rigidly fixed to a longitudinal element (34) of the vehicle structure, which is integrated into the side wall of the compartment.
